

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

April 5, 2000

LB 1330

SENATOR CUDABACK: One minute.

SENATOR CHAMBERS: ...of factors to us, but what we can surmise is that we would probably see about 3,500 new jobs created. That's what Senator Withem thought. How many were actually created? Not one. How many shovels of dirt did Micron turn? Not one. Did Micron build in Nebraska? No. Where did Micron build? Right at home; which they were tricked, Nebraska, Oklahoma, and Utah. But to continue: we would probably see about 6,500 spin-off jobs for a total of about 10,000 jobs. That 10,000 reached a vanishing point which was zero. These are not within the computer industry. They are not low paying entry level jobs. He should have said these are not jobs, period. These are substantial head of household types of positions, which would mean we would probably see an expansion of opportunity for about 20,000 more people to come into our state.

SENATOR CUDABACK: Time. Senator Chambers, your light is next. You may continue.

SENATOR CHAMBERS: Thank you, Mr. President. As I said, it is necessary for me on occasion to digress. I'm sure Senator Withem, former Senator Withem never thought his words would come back in the way that they are today, where it will be shown how naive, how totally duped, deluded, and suckered he had been and how he had managed to do the same thing to a substantial number of his colleagues who went along thinking that there were going to be 3,500 new jobs created. Then there would be 6,500 spin-off jobs for a total of 10,000 jobs. And these would be head of the household positions, an expansion of opportunity for about 20,000 more people to come into our state. Where are those 20,000 people coming into Nebraska? Senator Bruning and others are passing bills, or trying to, to keep people from leaving Nebraska. So, once again, they were tricked, duped, deluded and "tooken," taken. Continuing with Senator Withem, in his naivety, was saying: that's a community equivalent to the community of, say, Fremont. It would have a huge tremendous economic impact on our state. It's important, I think, that we pass these bills because of the Micron project. But I would like to go one step further and comment that I've been involved in the last two or three years, in various capacities, as
